

G U I L T Y U N T I L P R O V E N I N N O C E N T : *Antioxidants, Foods, Supplements, and Cosmetics*

Gagik Melikyan

Delta, Los Angeles, 2011, 376pp.

OUTLINE

Preface	1
Chapter 1. Introduction	5
Chapter 2. Human Enzymes Involved in Food Processing	11
2.1. Disposition of Cytochrome P450 Enzymes	11
2.2. What Kind of Chemical Transformations Can Cytochrome P450 Enzymes Induce?	20
2.3. Do We Know What Happens to Food During a Digestion Process?	41
Bibliography	47
Chapter 3. Phenolic Compounds. The Concept of an “Antioxidant”	51
3.1. Food Preservation	51
3.2. What Are “Phenol” and “Phenolic Compounds”?	53
3.3. What Is Known About the Toxicity of Phenol?	54
3.4. How Do Antioxidants Work?	57
3.5. From “Food Preservation” to “Body Preservation”	69
3.6. Natural Antioxidants	77
Bibliography	83
Chapter 4. Are Phenolic Compounds Good for the Human Body?	87
4.1. Biological and Medicinal Relevance	87
4.2. “Hazardous Drugs”: an Oxymoron That Kills	104
4.3. Bisphenol A Saga	115
Bibliography	121
Chapter 5. The Concept of “Naturalness”: Is “Natural” Synonymous with “Good” and “Harmless”?	125

Bibliography	134
Chapter 6. Antioxidant Rush	135
6.1. How the Antioxidants Are Found: Methodology	135
6.2. Interpretation of Data, Transferability, and Alleged Health Benefits	143
Bibliography	152
Chapter 7. Carcinogenic Antioxidants: a Dangerous Oxymoron	157
Bibliography	164
Chapter 8. Lessons of History Not Learned	167
Bibliography	175
Chapter 9. A Critical Look at the Consumer Basket. Will There Be Life Without Coffee and Tea?	177
9.1. Coffee	177
9.2. Tea: Green, Black, and Oolong	197
9.3. Red Wine	214
9.4. Spirulina	225
Bibliography	228
Chapter 10. Cosmetics: a Russian Roulette	243
10.1. Hair Color	244
10.2. Parabens: Antimicrobial Agents	260
10.3. Sunscreen Lotions	274
Bibliography	286
Chapter 11. Why Benzene and Benzenoids Can Be Hazardous to Your Body, or Abuse of Body DNA-Repairing Capabilities	291
11.1. Carcinogenicity of Benzene	291
11.2. Carcinogenicity of Polynuclear Aromatic Hydrocarbons (PAH)	301
Bibliography	312
Chapter 12. What Needs to Be Done?	317
12.1. The Concept of “NonPhenolic & NonBenzenoid (NP&NB) Food”	317
12.2. Introducing a New Food Standard or “Structural and Metabolomic Characterization	

(SMC)” Requirement	322
12.3. Empowering the Public. Transition to Knowledge-Based Food Consumption	326
Bibliography	344
Chapter 13. Conclusions	345
Bibliography	353
Abbreviations	355
Index	359
